SUBSTANDARD WATER SERVICE REPLACEMENTS

Frank Street & Louise Street

Dear Residents and Abutters of Frank Street and Louise Street:

The Watertown Department of Public Works and our contractor, Commonwealth Construction, would like to inform you that we will be replacing *only* sub-standard (cement lined and/or cast iron, or undersized copper) water services. This work is in preparation for road reconstruction later this year.

Replacements and upgrades will include only the water service pipe from the town water main to the curb stop (in the sidewalk area). The work for each home will require approximately 3-6 hours to complete.

Weather permitting, work will begin on Tuesday, June 2, 2020.

Based on our records, work is anticipated at the following house services:

#6, #10-132, #16, #17, #22, #25, #30-32, #39, #42 and #45 Frank Street
#24-26 Louise Street
#244 North Beacon Street (service off Louise Street)

If your address is not listed, then our records indicate your water service is standard 1-inch copper and does not require replacement.

The Watertown Police will be informed of the construction and its effects. Typical hours of construction work are from 7:00 AM to 4:00 PM.

We understand that the process is noisy, messy and disruptive and apologize in advance for inconvenience you may experience.

Should you have any questions, you may call Public Works at 617.972.6420.

Sincerely,

Gerald S. Mee, Jr.
Superintendent of Public Works
